AT&T Training Center

Take the opportunity to get hands on experience and knowledge with AT&T Training Center

What is AT&T Training Center?

Education system developed by AT&T Global Network Services Czech Republic s.r.o, provided to university students as part of University tuition. AT&T training center provides specialized trainings in addition to CISCO CCNA and CCNP courses handled by university in present.

At the training you will get understanding of technologies used in real network environment and will be introduced to typical incidents troubleshooting as well as basic configuration of various assets. Practical examples are maintained in LAB environment on real assets as well as virtual devices.

What modules can you enroll for in 2017?

Firewall Technologies Practice

FW technologies practice module is intended for students possessing CCNA up to CCNP networking skills and are interested in the networking security area. The course provides an overview of firewall technologies (ASA, Check Point, Juniper) commonly used in customer environments. Educated technologies do extend students practical security skills required for junior security engineer position.

Mobility Provisioning

Mobility Provisioning Module is intended for students possessing strong networking and Unix/Linux skills and is interested in mobility network management and provisioning. The course provides an overview of mobility networks and shows AT&T's implementation of mobility network in US. Course topics are intended to improve student's skills required for junior mobility engineer position.

Global Software Development

This module is intended for students with general experience of front-end and back-end programming languages, and will focus on how they are applied in an international environment. Working with AT&T Brno's software development team, students will be guided through all aspects of creating and deploying a professional open-source project with one of the biggest companies in the world.

Cisco IP Telephony

IP telephony is the corner stone of Cisco's Unified Communications and Collaboration portfolio. It is suitable for students with basic understanding of Cisco routing and switching concepts and would like to explore the world of Enterprise Voice, Video and Contact Centers over IP world.

Enrollment starts in Jan 2017 at http://tinyurl.com/FIMU-JS2017-ATT
