# Network Security – Do It Right

# Who We Are?

# What We Do?

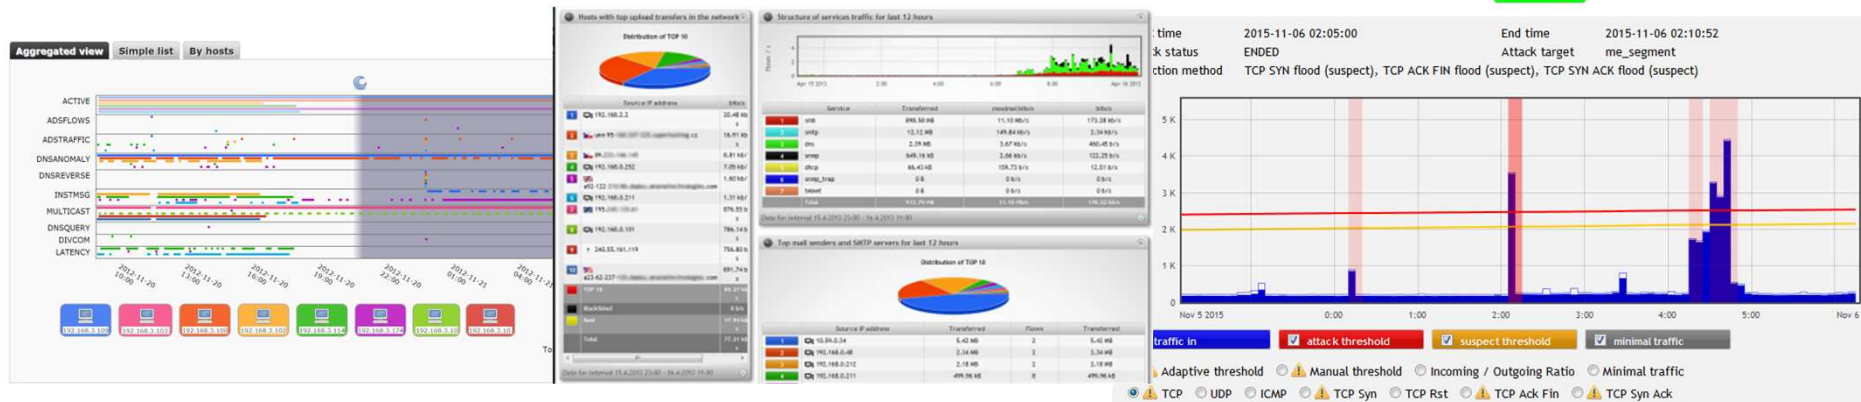

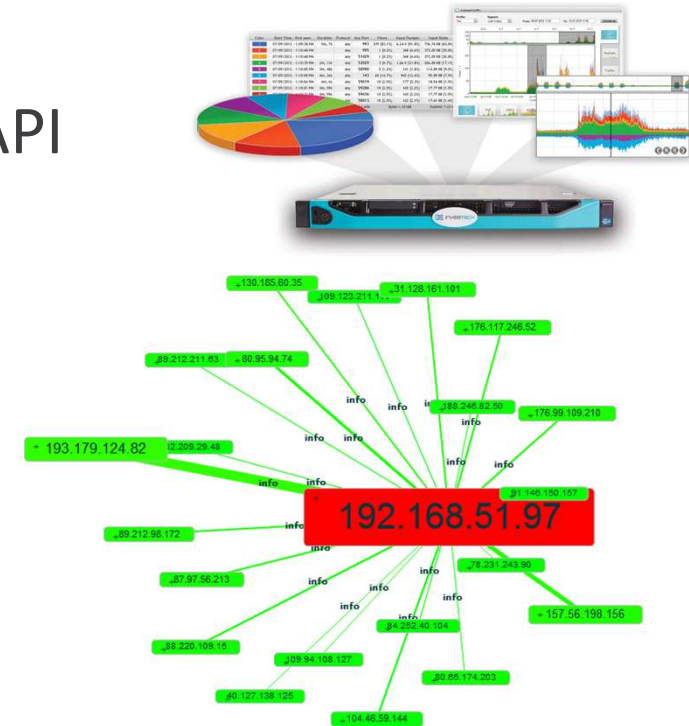

Indicator	Risk level	Comment
Number of connections	OK	values as expected
Communication partners	MEDIUM	increased numbers, P2P networks indicated
Attacks against network services	OK	not detected
Infected devices	HIGH	192.168.5.47, infected workstation with Windows OS
Foreign communication	OK	values as expected
Proxy server bypass	MEDIUM	devices from segment 192.168.11.0/24
Port scanning	LOW	192.168.5.91, probably misconfiguration
E-mail traffic	OK	only through authorized SMTP servers
Potential data leakage	HIGH	192.168.5.169, regular upload to 65.55.195.238
P2P networks	HIGH	192.168.6.116, 192.168.6.124 BitTorrent detected
Websharing services	MEDIUM	rappidshare.com is being widely used
On-line messengers	LOW	detected Skype, ICQ
Anonymization devices	HIGH	192.168.6.36, TOR client
Blacklisted addresses	OK	not detected
DNS anomalies and attacks	OK	not detected
TELNET protocol	OK	not being used
Tunneling IPv6 traffic	LOW	misconfiguration of IPv6 protocol at workstations
