Extract-Transform-Load

www.cloveretl.com
What is CloverETL?

Software that enables customers to define data sources and targets, data flows among them and apply business rules along the way.

CloverETL is family of Java-based products

- **CloverETL Engine**: An embedded library
- **CloverETL Designer**: Desktop use
- **CloverETL Data Profiler**: Data quality analysis
- **CloverETL Server**: Enterprise deployment
- **CloverETL Cluster**: Parallel processing
CloverETL Engine

The core concept in CloverETL data processing is a transformation graph.
CloverETL Designer
Development challenges

Design for large deployments
*GC overhead limit exceeded* on 200 GB of RAM

Complex use-cases
Design workflow engine to use instead of scripting

Modern technology
Hadoop, Amazon EC2, parallel processing
We’re doing fine

During **ten years in business** we’ve gained many respectable customers.

- IBM
- GoodData
- DHL
- ŠkoFIN
- accenture
- Oracle
- Cisco
- Comcast
- SalesForce
- MuleSoft
