importance of the Mainframe

—67% of most important corporate data resides on mainframes

—90% of Fortune 1000 rely on mainframes
  - 99% are CA customers

—Descends from System/360
  - IBM announced on April 7, 1964

—z/OS, OS/390, MVS, VM, VSE

—Handles and balances extremely large workloads
why do companies want a Mainframe?

— Cost-effective, environmentally sound and reliable platform

— The mainframe offers:
  - Security to safeguard against business risk
  - Reliability and Availability – delivering 99.999% uptime
  - Environmental friendliness requiring less energy and cooling
  - Virtualization allowing hundreds or thousands of different concurrent operating system images
  - Efficient staffing, taking fewer people to manage a given number of operating system images
  - Disaster Recovery – since hot and cold backups can be up and running with minimal delay
Mainframe 2.0 – Next Generation
