

SELECTED PAPERS from 155 publications

Jozef Gruska

1. One-way finite automata with quantum and classical states, Co-authors: Shenggen Zhen, Daowen Qiu, Lvzhou li, in print, 17 pages
2. De-quantisation, AIP Conference Proceedings, in print
3. Quantum finite automata (Co-authors, Daowen Qiu, L. Li and P. Mateus ), CRC Handbook on Finite State based Models and Applications, to appear in February 2012.
4. Quantum entanglement and new peception of informatics, AIP Conference Proceedings (Eds. D. Home, G. Kar and A. Majumdar), V 1384, 59-65 p, 2011
5. Multi-letter Quantum Finite Automata: Decidability of the Equivalence and Minimization of States. Co-authors: Daowen Qiu, Lvzhou Li, Xiangfu Zou, Paulo Mateus, Acta Informatica, V48, N 5-6, 2011, 23 page
6. Impulses and roads to a new perception of informatics, in "Rainbow of Computer Science", edited by C. Calude, A. Salomaa and G. Rozenberg, Springer Verlag, 2011, p. 183-199
7. J. Gruska: Impacts of informatics on QIPC, Quantum signal and information,, Nanjing university of Post and Telecommunication, 2011, 40-48 p
8. From classical cryptography to quantum physics through quantum cryptography. Journal of the India Institute of Science, V 89, N3, 271-282 str., 2009
9. Quantum computation, Willey Encyclopedia of Computer Science and Engineering, 2297-2310, 2009
10. The firing squad synchronization problem on squares, toruses and rings (co-authors: S. La Torre, M. Parente), International Journal on Foundations of computer Science, V18, N3, 637-654
11. Quantum informatics and its relation to informatics, physics and mathematics (A dialog with Cris Calude), Bulletin of EATCS, June issues N92, pages 20 - 30, October issue, pages N93, pages 33-49, 2007
12. Algebraic methods in quantum informatics, in "Algebraic Informatics", Springer, LNCS 4728, 87-111, 2007
13. From informatics to quantum informatics, Proceedings of the Fourth IFIP International Conference on Theoretical Computer Science- TCS 2006 at the World Computer Congress, Springer, 17-46, 2006

14. The emergence and challenges of quantum informatics, it-Information technology, V48, issue 6, 336-343, 2006, Special issue devoted to Thomas Beth, Ed. R. Vollmar
15. Quantum informatics paradigms and tools for QIPC, Quantum computing, Proceedings of BAcKaction, a conference in Kanpur, March 2006, Ed. D. Goswami, AIP conference proceedings # 864, 1-10
16. Different Time Solutions for the Firing Squad Synchronization Problem on Basic Grid Networks, Theoretical Informatics and Applications, co-authors: iS. La Torre, M. Napoli and M. Parente, V 40, 177-206, 2006.
17. A broader view on limitations of information processing and communication by nature, Natural computing, V6, 75-112, 2007, Springer
18. From informatics to quantum informatics, Proceedings of the Fourth IFIP International Conference on Theoretical Computer Science- TCS 2006 at the World Computer Congress, Springer, 17-46, 2006
19. Security in quantum multipartite cryptography, in Aspects of Network and Information Security, Proceedings of the NATO Advance Study Institute on Network Security and Intrusion Detection, Yerevan, 2005, IOS Press, ISBN 978 1-58603 856 4 submitted, 30 pages
20. Quantum finite automata: an invitation, (Eds. Z. Esik, C. Martin-Vide, V. Mitrană): Recent advances in Formal Languages and Applications, Studies in Computational Intelligence 25, Springer Verlag, 81-117, 2006.
21. Quantum complexity theory tools, goals and challenges, In Quantum information and communication, Proceedings of QICC'05, Allied Publishers, Eds: S. P. Pal and S. Kumar, ISBN 81-8424-064-3, 2006, 175-197.
22. Universality and optimality of quantum information processing primitives, In Quantum information and communication, Proceedings of QICC'05, Allied Publishers, Eds: S. P. Pal and S. Kumar, ISBN 81-8424-064-3, 2006, 1-18.
23. Main challenges and driving forces of IT in the era of globalization, Proceedings of Shanghai Forum, 8th Information Technology, Fudan University Press, Shanghai, 60-72, May 16-17, 2005
24. Optimal time & communication solution of firing squad synchronization problems on square arrays, toruses and rings , co-authors Dominik Parente and Salvatore La Torre, Proceedings of DLT'04, 200-211, LNCS 3340, 2004
25. Quantum complexity theory goals and challenges. Special issue of The International Journal on Quantum Information Processing, devoted to Camerino conference, V3, N1, 31-40, 2005

26. Universal sets of quantum information processing primitives and optimal use of such primitives, General Theory of information transfer and combinatorics, Proceedings of the Bielefeld Workshop in information transmission and combinatorics, edited by R. Ahlswede, LNCS 4123, Springer Verlag, 2006, pages 356-377, see also Electronic Notes in Discrete mathematics, V21, 285-289, 2005
27. Quantum entanglement as a new quantum information processing resource, New Generation Computing, V21, N4, 279-296, 2003
28. Succinctness in quantum information processing. Proceedings of DCFS Conference, MTA SZTAKI, Budapest July 2003, 15-25.
29. Quantum information processing, Proceedings of the annual database conference DATACON, Masaryk University, 2002, 77-112.
30. Power of quantum entanglement, co-authors H. Imai and K. Matsumoto, in Proceedings "Foundations of information technology in the era of network and mobile computing", IFIP'02 World Computer Congress, pages 3-22, Kluwer Academic Publisher, 2002
31. Puzzles, mysteries and power of quantum entanglement, co-author H. Imai, Proceedings of MCU'01, Ciseneu, LNCS 2055, Springer-Verlag, 25-69, 2001.
32. Quantum computing challenges, In "Mathematics unlimited: 2001 and beyond, Springer-Verlag, 529-564.
33. Quantum models and modes of computation and communication. co-author R. Vollmar, Proceedings of RIMS Workshop, Kyoto, March 22-23, pages 76-85, 2000
34. Quantum finite automata. co-author co-author R. Vollmar, Proceedings of the Kyoto International Conference on Words, Languages and Combinatorics III, Kyoto, March 15-19, 2000, World Scientific, 2003, 192-211.
35. Quantum implications of quantum automata, Proceedings of NATO Workshop on decoherence in quantum computing, Mykonos, June 2000, 18 page
36. Quantumization of theoretical informatics, Proceedings of IFIP TCS2000, Springer-Verlag, LNCS 1872, 604-608, 2000.
37. Descriptive complexity issues in quantum computing, Journal of Automata, Languages and Combinatorics, V5, N3, 191-218, 2000
38. Quantumization of Informatics, Proceedings of Riga Workshop on Quantum Computation and learning, Mälardalen University and Riga University, 1999, 9-32.
39. Quantum challenges, Proceedings of SOFSEM'99, Springer-Verlag, LNCS, 1523, p. 2-29, 1999.
40. Quantum challenges in descriptive complexity, Pre-proceedings of the International Workshop on Descriptive Complexity of Automata, Grammars and Related Structures, Universität Magdeburg, Dept. of Computer Science, preprint Nr. 17, 23-38.

41. Quantum computing, McGraw-Hill, 1999, 440 pages
42. Fix-point semantics of systolic systems transformation. Joint author I. Guessarian, Journal of Automata, Languages and Combinatorics, V2, 1997, 93-133
43. Foundations of computing, International Thomson Computer Press, XV+720 pages, in 1997
44. Adjusting informatics education to information era. Joint author R. Vollmar, in Foundations of Computer Science: Potential — Theory — Cognition, Eds. Ch. Freksa, M. Jantzen, R. Valk, LNCS 1337, 1997, 49-67.
45. Foundations of computing, International Thomson Computer Press, XV+720 pages, in 1997
46. Succinctness of descriptions of SBTA-languages. Joint authors: A. Monti, M. Napoli, D. Parente, TCS, V179, N 1-2, 251-271, 1997.
47. State complexity of SBTA languages. Joint authors: E. Fachini, M. Napoli, D. Parente. Proceedings of LATIN'95, LNCS 911, Springer-Verlag 346-357, 1995.
48. Fix-point semantics of synchronized systems and correctness of their basic transformations. Joint-author: I.Guessarian, Proceedings of IFIP Congress'94, INFORMATION PROCESSING'94, 231-238
49. Optimization of systolic tree automata. Joint authors: M. Napoli, D. Parente, Proceedings of IFIP Congress'94, INFORMATION PROCESSING'94, 247-252.
50. Normal forms and nondeterminism in Y-tree systolic automata. Joint authors: E. Fachini, M. Napoli, D. Parente, in the "Proceedings of the second International Colloquium on Words, Languages and Combinatorics" in Kyoto, 1992, ED. M. Ito and H. Jürgensen, World Scientific, 143-154, Kyoto, 1994.
51. Why we should not any longer only repair, polish and iron current computer science education. Proceedings of IFIP WG3.2 Working Conference "Informatics at university level: Teaching advanced subjects in the future", ETH Zurich, 1991, Education & Computing 8, 1993, 303-330.
52. Power of Interconnections and of Nondeterminism in Regular T-tree Systolic Automata. Joint authors: E. Fachini, M. Napoli and D. Parente. Mathematical System Theory, V28, 245-266, 1995.
53. Maturing of Informatics, (joint-author H. Jürgensen) in "Images of programming", edited by D. Bjorner, V. Kotov, Elsevier Science Publisher, 1991, I-55 -I-69.
54. Synthesis, structure, and power of systolic computations. Theoretical Computer Science, V71, 1990, 47-77

55. Simulation of systolic tree automata on trellis automata. Joint authors: E. Fachini, A. Maggiolo Schettini, D. Singiorgi, International Journal on Foundations of Computer Science, V1, N2, 1990, 87-110.
56. Systolic architectures, systems and computations. Proceedings of ICALP'88, LNCS 317, 1988, Springer-Verlag, 254-270..
57. Pragmatic aspects of complexity theory (position statement for panel with J. Gruska (chair), J. Hartmanis). L. Valiant and J. van leeuwen) Proceedings of IFIP'86 World computer Congress, 1986, North-Holland, 1-1.
58. Modular trellis automata. Joint author: A. Černý, Fundamenta Informaticae IX, 1986, 253-282.
59. Systolic trellis automata: stability, decidability and complexity. Joint authors: K. Culik, A. Salomaa, Information and Control, V71, N3, 1986, 218-230.
60. Modular trellises. Joint author: A. Černý, in "Book of L", Springer-Verlag, 1986, 45-62.
61. Systolic trellis automata. Joint authors: K. Culik II, A. Salomaa, International Journal on Computer Mathematics, 1984, V15, 195-212, V16, 3-22.
62. Systolic automata - power, characterization, non-homogeneity. Proceedings of MFCS'84, LNCS 176, 1984, 32-49.
63. Systolic automata for VLSI on balanced trees. Join authors: K. Culik II, A. Salomaa, Acta Informatica, V18, 1983, 10-18
64. On a family of languages resulting from systolic tree automata. Joint authors: K. Culik II, A. Salomaa, Theoretical Computer Science, V23, 1983, 231-242
65. On non-regular context-free languages and pumping. Joint authors: K. Culik II, A. Salomaa, EATCS Bulletin, N16, 1982, 22-24
66. Descriptive complexity (of languages) - a short survey. Proceedings of MFCS'76, LNCS 45, 1976, 65-80.
67. Generalized context-free grammars. Acta Cybernetica. V2, 1973, 35-39.
68. Algebraic characterization and complexity of context-free languages. Proceedings of Mini-conference on Algebraic Theory of Automata, Szeged, 1973, 10-14.
69. On star-height hierarchies of context-free languages. Kybernetika, V9, 1973, 231-236.
70. Descriptive complexity of context-free languages. Proceedings of MFCS'73, High Tatras, 1973, 71-85.
71. On the size of context-free grammars. Kybernetika, V8, 1972, 213-218
72. Generation and approximation of finite and infinite languages. Proceedings of MFCS'72, Warsaw, 1972, 1-7

73. A characterization of context-free languages. Journal of Computer and System Sciences, V5, 1971, 353-363 (Reprinted in Russian in "Kiberneticheski sbornik", V9, Moscow, 1972, 114-126.
74. Complexity and unambiguity of context-free grammars and languages. Information and Control, V18, 1971, 502-519
75. Unambiguity of context-free grammars and languages. Information Processing 68, North-Holland, 1971, 135-139
76. Some classification of context-free languages. Information and Control, V14, 1969, 152-173.
77. On a classification of context-free languages. Kybernetika, V3, 1967, 22-29.
78. Calculation of thin-walled bars. Book in Slovak, joint-author: A. Mrázik, Publishing House, Slovak Academy of Sciences, 1965, 120 p.
79. Tables for determining the critical stresses of thin-walled bars and the use of a computer for calculation. In Slovak ,joint authors: A. Mrázik,I. Plander, Stavebnický Časopis, V9, 1961, 461-484
80. Program for calculating forced vibrations in torsional vibrating systems by an automatic computer. Joint author: I. Plander, Bulletinul Insitutului Politehnic, DIN IASI, V10, 1964, 269-278
