

Special public lecture in Evolutionary Bioinformatics:

Dr. Ingo Ebersberger

*Center for Integrative Bioinformatics in Vienna  
Vienna University*

## **Human genetic ancestry: When branches get short**

*Dec 4<sup>th</sup> 2007, 9am  
B204, FI MU  
Botanická 68a, Brno*

Dr. Ebersberger currently works in the laboratory of Arndt von Haesseler at the Center for Integrated Bioinformatics in Vienna and the Vienna University. He received his doctorate degree from the University in Leipzig, working on sequence comparisons between humans and chimpanzees. Most of his current activities aim at deciphering the evolutionary clues hidden in rapidly accumulating genomic data. He is visiting Brno to teach an advanced course in Evolutionary Bioinformatics.
