

Special public lecture in Structural Bioinformatics:

Dr. Alexandre G. de Brevern

*Genomics and Molecular Bioinformatics Team,
INSERM, University Denis Diderot Paris*

Local protein structure: how to go beyond the classical secondary structure and why?

*Nov 5th 2008, 3pm
B517, FI MU
Botanická 68a, Brno*

Dr. Alexandre de Brevern is visiting Prague and Brno under the "Vltava" program of the French Embassy in Prague for scientific exchange between our countries. He received his doctorate degree in bioinformatics from the Denis Diderot University in Paris in 2001. He is a full-time researcher at the French Institute of Health and Medical Care best known for his work on protein structural alphabets.
