

LOGEX
Solution Center

OUR MISSION IS TO HELP HEALTH SYSTEMS AROUND THE WORLD TO IMPROVE THE RETURN ON THEIR DATA TO DRIVE BETTER PERFORMANCE

Unmatched expertise in health care sector
> 10 year of interaction with clients

Comprehensive solutions
Proprietary Smart Hospital Grid powers our advanced analytical models

Clear and actionable insights
One truth based on data and facts to get a sharper view

BIG DATA
>80 hospitals and >50 billion data records in LOGEX benchmark

LOGEX powers modern health care by supporting medical and financial professionals to take the best informed, data-driven decisions to deliver care as efficiently as possible

INTERNATIONAL

Global company operating in the Netherlands, Czech Republic and we currently joined with other similar companies in Scandinavia. A number of different nationalities are represented throughout our offices.

GREAT IN BRNO

We have **a new branch in Brno**, which was founded as a solution center of the company. We are working here on LOGEX's products, we are **closely involved with an implementation** of our ground-breaking products.

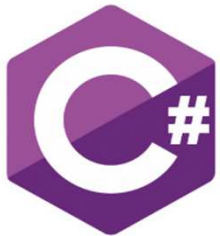

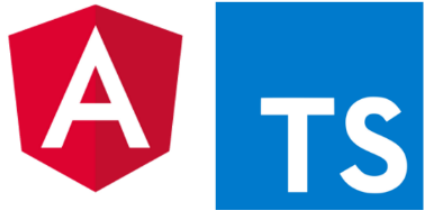

STABLE & ATTRACTIVE

Since 2008, the company has steadily grown and became **an analytics center of Dutch healthcare**. Thanks to our products, we are now a thought leader, cooperating with all stakeholders and **more than 90% of Dutch hospitals**.

ACTIVE

We are a **young experienced team** of professionals, which is growing and where we all can come up with new ideas and realize them – **more action, less talking**.

WHO ARE WE LOOKING FOR

We are looking for candidates experienced in developing web applications, and collaborating to produce scalable and user-friendly applications. They should value performance, security and craftsmanship.

YOUR MISSION

you will be responsible for designing and creating applications which will support the 'LOGEX Smart Hospital Grid'. You would develop tools in order to improve the usability of our advanced analytical models.

Your mission would be create comprehensive, easy-to-understand overview of client's data with the best user experience possible.

WHO ARE WE LOOKING FOR

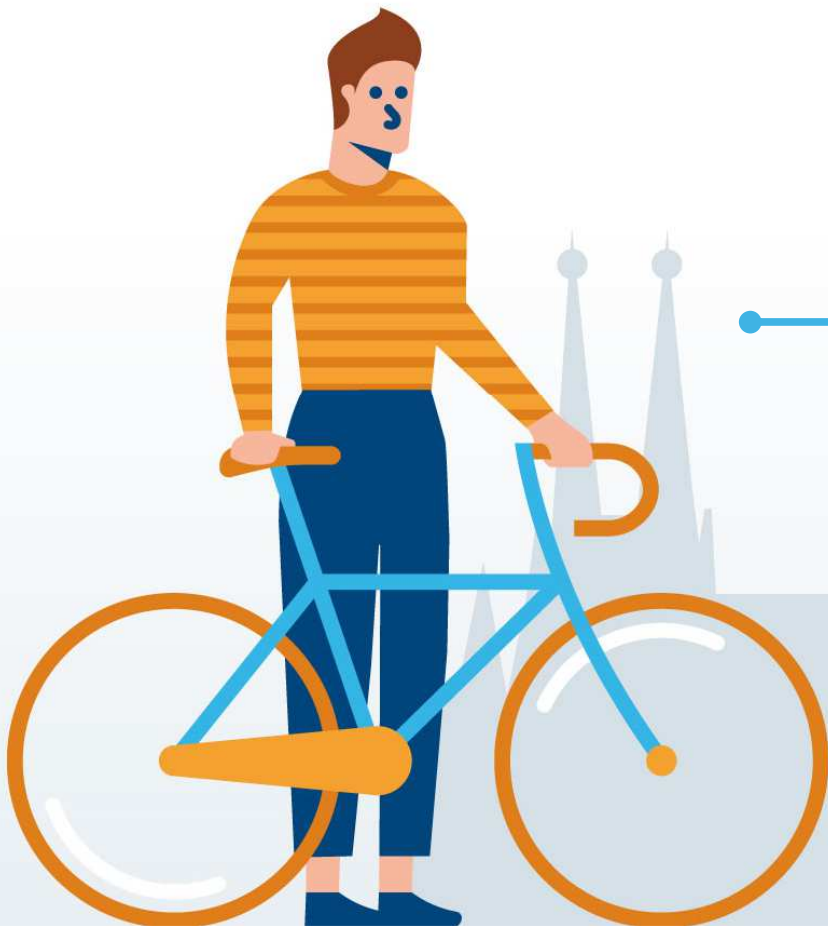

We are looking for candidates experienced in creating DB scheme and maintaining it afterwards, and who has an ability to comprehend functional requirements and translate those insights into scalable solutions with little supervision.

YOUR MISSION

You would be in close collaboration with web developers and analytics in purpose of discovering new functionalities and extending of existing analytical tools. You would interpret needs of analytics into DB scheme and later on validate the results.

You would be responsible for integrating new data sources into the Data Warehouse.

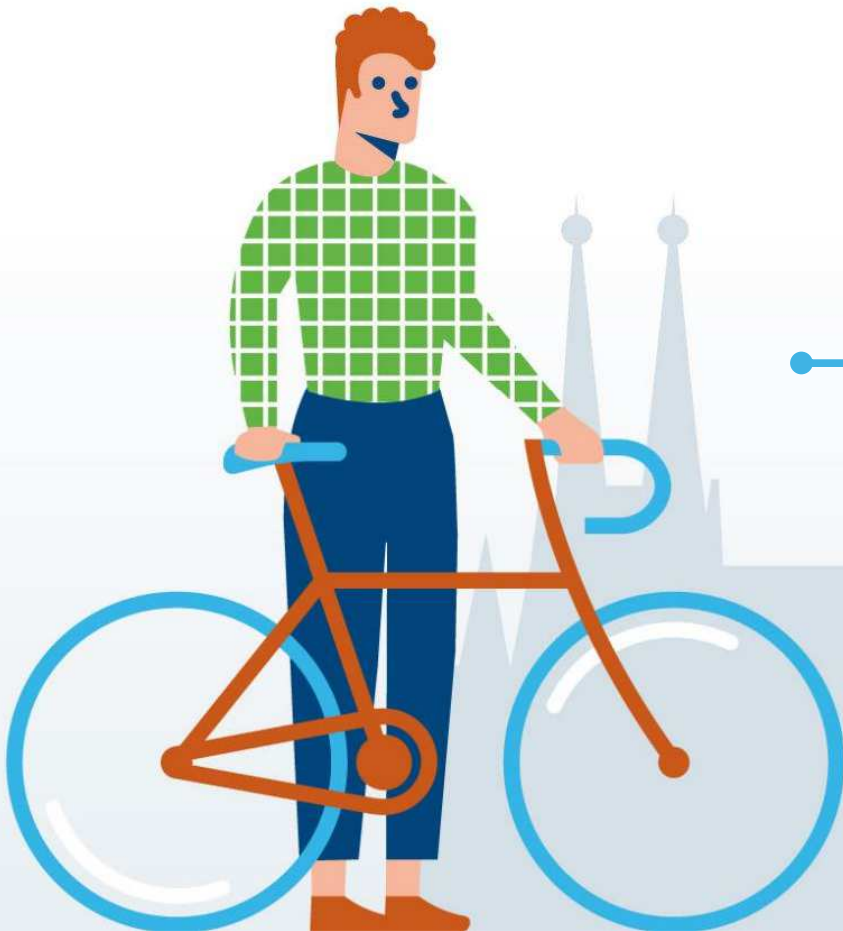

WHO ARE WE LOOKING FOR

We are looking for candidates who wants to learn and can also do a bit of DBA, values freedom in work and is able to work well with little supervision. That means our DevOps should be dedicated and self-driven – sometimes to be able to create his own projects and be proactive.

YOUR MISSION

As our DevOps, you would be **running IT operations for 20+ developers for whom** you would maintain the Continuous Integration and Deployment stream like improving processes, create new projects and troubleshooting. You would also manage data lifecycle between DTAP environments. From DBA it would be general tasks in SQL, permissions management and performance monitoring.

BE INDEPENDENT AND RESPONSIBLE

TO HAVE A DESIRE TO LEARN

You want to **learn new things** and want **challenges**.

BE RESULT ORIENTED

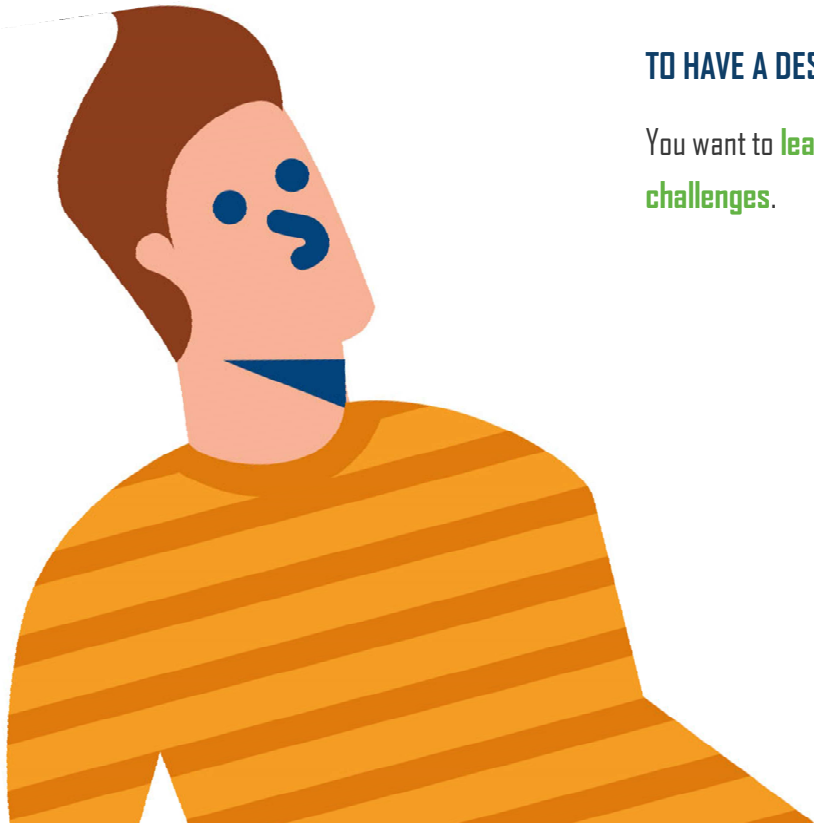

You **care about result** of your work and want to be **active**.

BE A TEAM PLAYER

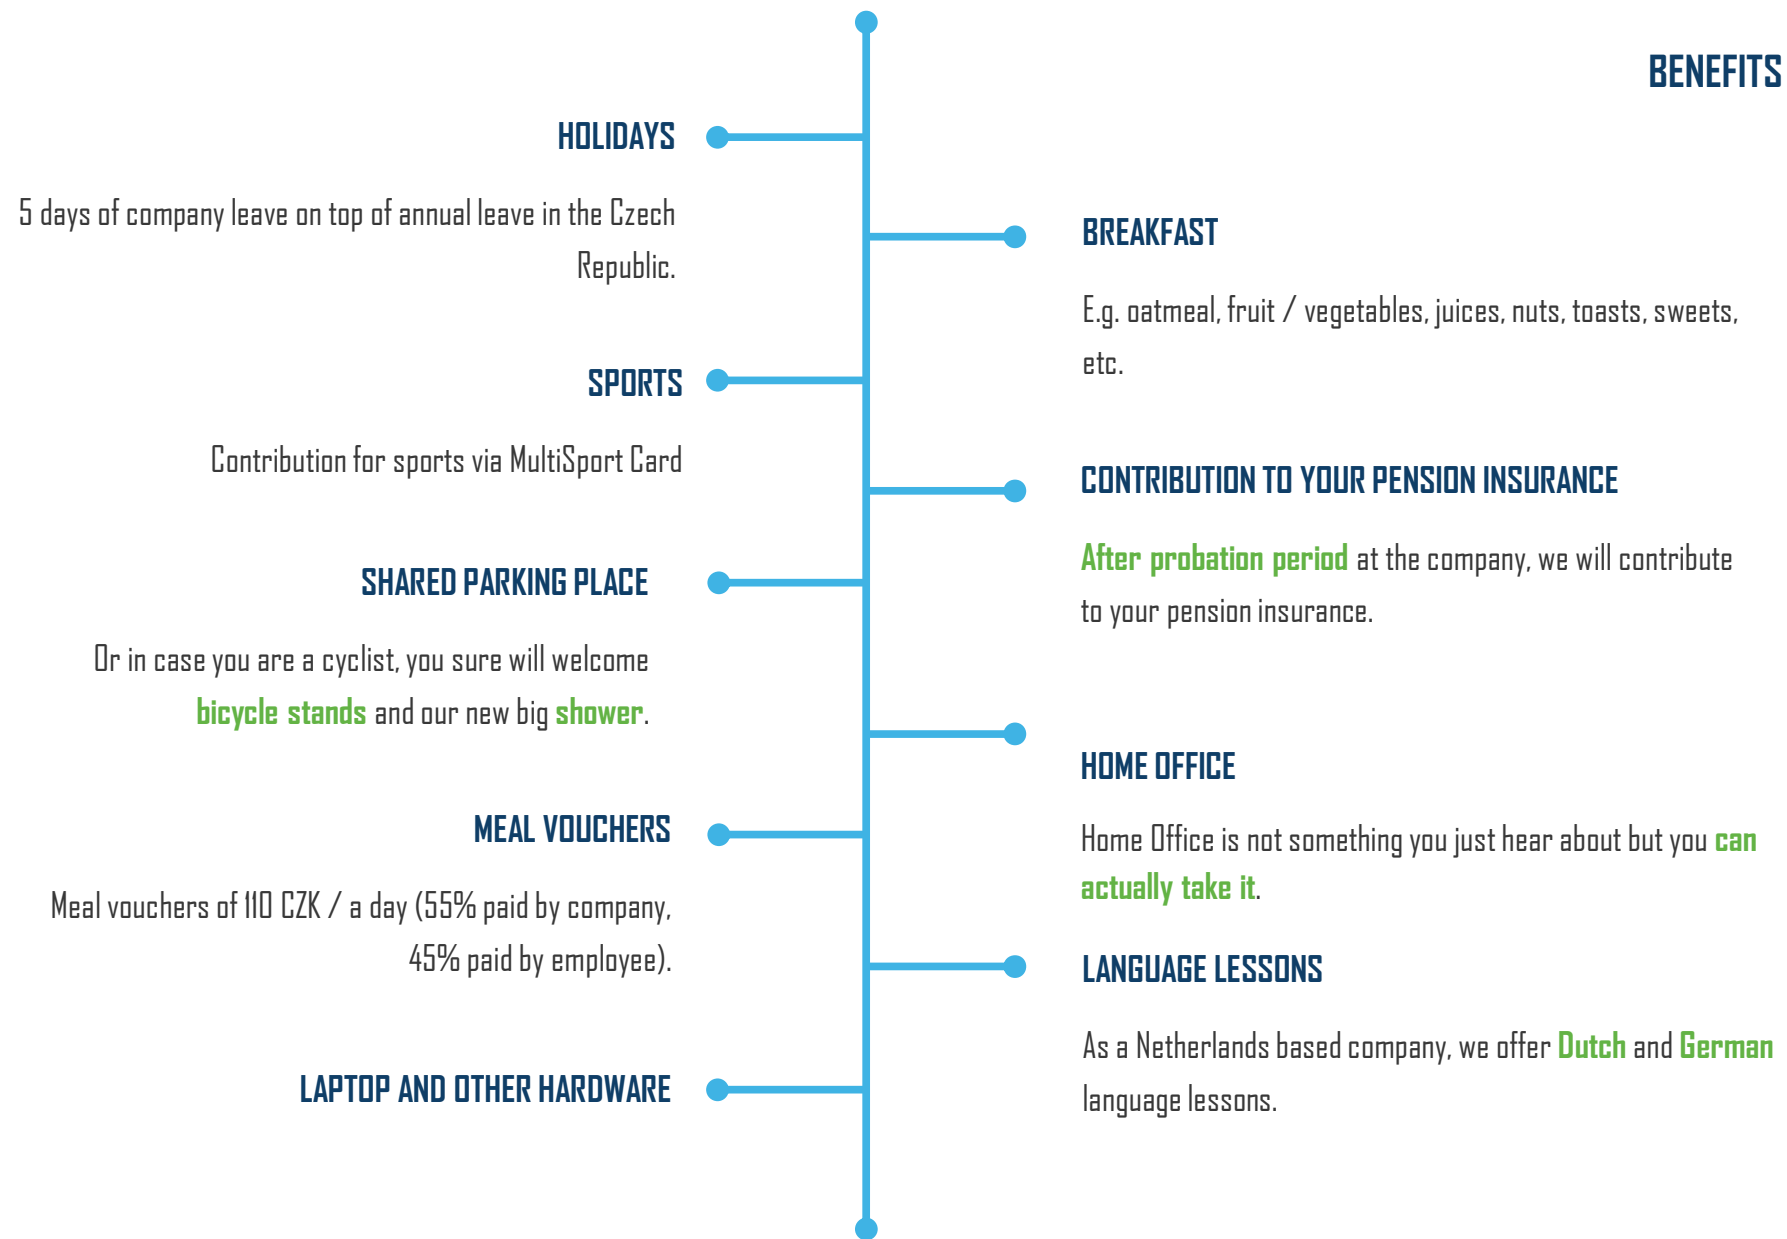

We are still smaller team, that's why we are looking for a **good team player**.

LIKE FREEDOM

You want **freedom** at your work.

**We contribute to better,
more affordable healthcare.**
