

Flowmon Networks

Flowmon Use Cases

2008

- Network visibility, reporting & troubleshooting
- Flowmon **Probe** & Flowmon **Collector**

2009

- Network Behavior Analysis & Anomaly Detection
- Flowmon **ADS**

2014

- Application Performance Monitoring
- Flowmon **APM**

2014

- Full Packet Capture
- Flowmon **Traffic Recorder**

2015

- DDoS Protection
- Flowmon **DDoS Defender**

Flowmon in Gartner MQ

Magic Quadrant for Network Performance Monitoring and Diagnostics

🕒 01 February 2016 📄 G00275307

Analyst(s): [Sanjit Ganguli](#) | [Vivek Bhalla](#)

Summary

NPMD solutions play a key role in helping IT ops support increasingly complex technologies and services with network visibility, detection of performance issues and root cause analysis. Vendors continue to innovate with operational analytics, integrated GUIs and more flexible deployment options.
