

If you try to reach for the stars  
you may not always get one,  
but you won't come up with a handful of mud either. (L. Burnett)

Science is like sex.  
It sometimes produces practical results,  
but this is not the main reason why people do it.  
(R. Feynman)

Theories are lies that help us to discover truths.

A good talk should contain  
one proof and one joke  
and it should be clear  
which one is the proof  
and which one is the joke.

Progress in science is sometimes  
made by pessimists,  
progress in technology is always  
made by optimists.

Our best theories are not only truer than common sense,  
they make far more sense than common sense has.  
(D. Deutsch)

If you are really looking for the truth,  
look for it where it is  
- at the bottom of a bottom-less pit.

A traveler who refuses to pass over a bridge  
until he has personally tested the soundness of every part of it  
is not likely to go far;  
something must be risked,  
even in mathematics. (H. Lamb)

A good program should contain  
one part to make one wiser and one part to make one happier  
and it should be clear  
which one is to remember  
and which one to enjoy.

It is well known that it is very hard to understand quantum physics.  
However, it is less known  
that understanding of quantum physics is child's play  
comparing with understanding of child's play.

One who is serious all day  
will never have good time,  
while one who is frivolous all day,  
will never establish a household.  
(Ptahhotep, 24 century B.C.)

The world is  
a dangerous place,  
especially  
if you're a qubit.

VHFUHW GH GHXB,  
VHFUHW GH GLHX.  
VHFUHW GH WURLV,  
VHFUHW GH WRXV.

Only with heart one can see well,  
what is essential is invisible to the eye.  
(A. Saint-Exupery)
